Professional Summary

Computer Science undergraduate graduating in 2027 with experience in backend development using Java, Spring Boot, REST APIs, and databases. Hands-on experience building full-stack and real-time applications, with strong problem-solving skills and 200+ DSA problems solved in Java.

Education

RGM College of Engineering & Technology (RGM CET), Nandyal

2023 – 2027 (Expected)

B.Tech in Computer Science and Engineering

CGPA: 9.47/10

Experience

Java Full Stack Developer Intern

Nov 2025 – Jan 2026

Infosys Springboard

[GitHub](#)

- Developed SiteSurvey, a Java full-stack application using Spring Boot and MySQL to manage site survey records.
- Implemented RESTful API endpoints supporting CRUD operations, request validation, and JSON response handling.
- Structured backend modules using object-oriented design and a layered Controller–Service–Repository architecture.
- Collaborated in a team-based Agile/Scrum environment, participating in regular meetings, providing daily progress updates, and contributing to iterative feature delivery.

Projects

SkillSwap — Real-Time Peer Learning Platform

[Live](#) | [GitHub](#)

Tech Stack: React.js, Node.js, Express.js, MongoDB, Socket.io, JWT

- Engineered a full-stack platform enabling users to exchange skills through real-time chat and one-to-one video learning sessions.
- Integrated the Jitsi Meet SDK to deliver browser-based live video learning sessions.
- Implemented event-driven, WebSocket-based messaging using Socket.io for real-time bidirectional communication.

DocSpot — Doctor Appointment Booking Platform

[Live](#) | [GitHub](#)

Tech Stack: React.js, Node.js, Express.js, MongoDB (Mongoose), JWT

- Built a full-stack healthcare appointment platform with role-based workflows for patients, doctors, and administrators.
- Designed 15+ RESTful APIs for appointment scheduling, availability, authentication, and administrative workflows.
- Supported 50+ test users and handled 100+ appointment requests during application testing.

College Enquiry Chatbot — AI-Based Web Application

[Live](#) | [GitHub](#)

Tech Stack: Python, Flask, Gemini API

- Built a Flask web application answering student queries related to admissions, courses, and campus facilities.
- Integrated the Gemini API with structured prompts to generate institution-specific responses.

Technical Skills

Languages: Java, C, JavaScript, Python

Core CS: Data Structures & Algorithms, Complexity Analysis, Object-Oriented Programming, DBMS, Operating Systems, Linux/Unix Fundamentals, Computer Networks

Backend: Spring Boot, Node.js, Express.js, RESTful APIs, WebSockets, Flask

Databases: MySQL, MongoDB

Tools: Git, GitHub, Postman, VS Code, npm

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Certifications

AWS Certified Cloud Practitioner — Amazon Web Services

Leadership & Achievements

- Treasurer, IEEE Computer Society Student Chapter — managed chapter finances and coordinated technical workshops.
- Shortlisted for Amazon ML Summer School 2026 (top 31,821 of 1,34,421 applicants).
- Lead, Cre8 Club — organized technical events and drove student participation; solved 200+ LeetCode problems.
