Professional Summary

Computer Science undergraduate skilled in full-stack development with the MERN stack (React.js, Node.js, Express.js, MongoDB). Built RESTful APIs, implemented JWT authentication, and integrated real-time features across three full-stack projects. Solved 200+ Data Structures & Algorithms problems in Java, with backend exposure to Spring Boot. Seeking Software Engineer and Full Stack Developer roles, while eager to explore new technologies and fields.

Education

RGM College of Engineering & Technology (RGM CET), Nandyal	2023 – 2027 (Expected)
B.Tech in Computer Science and Engineering	CGPA: 9.47/10
A.P Model School & Jr. College, Kurnool	2021 – 2023
Intermediate (MPC)	95%

Experience

Java Full Stack Developer Intern	Nov 2025 – Jan 2026
<i>Infosys Springboard</i>	GitHub
- Developed SiteSurvey, a Java full-stack application using Spring Boot and MySQL to manage site survey records. - Implemented RESTful API endpoints supporting CRUD operations, request validation, and JSON response handling. - Structured backend modules using object-oriented design and a layered Controller–Service–Repository architecture. - Collaborated in a team-based Agile/Scrum environment, participating in regular meetings, providing daily progress updates, and contributing to iterative feature delivery.	

Projects

SkillSwap — Real-Time Peer Learning Platform	Live GitHub
<i>Tech Stack: React.js, Node.js, Express.js, MongoDB, Socket.io, JWT</i>	
- Engineered a full-stack platform enabling users to exchange skills through real-time chat and one-to-one video learning sessions. - Integrated the Jitsi Meet SDK to deliver browser-based live video learning sessions. - Implemented event-driven, WebSocket-based messaging using Socket.io for real-time bidirectional communication. - Implemented secure user authentication using JWT and bcrypt.	
DocSpot — Healthcare Appointment System	Live GitHub
<i>Tech Stack: React.js, Node.js, Express.js, MongoDB</i>	
- Developed a role-based platform with separate doctor and patient dashboards enforcing per-role access permissions. - Designed RESTful APIs for appointment scheduling, availability checks, and patient record persistence in MongoDB. - Built appointment lifecycle management enabling doctors to approve, reject, and update booking status.	
College Enquiry Chatbot — AI-Based Web Application	Live GitHub
<i>Tech Stack: Python, Flask, Gemini API</i>	
- Developed an AI-powered chatbot to handle student queries related to admissions and campus information. - Integrated the Gemini API to generate context-aware and relevant responses. - Designed conversational workflows to deliver structured and accurate information.	

Technical Skills

Languages: Java, C, JavaScript, Python

Backend: Node.js, Express.js, RESTful APIs, WebSockets

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Databases: MySQL, MongoDB

Tools: Git, GitHub, Postman, VS Code

Leadership & Achievements

- Treasurer, IEEE Computer Society Student Chapter – managed chapter finances and coordinated technical workshops.
- Shortlisted for Amazon ML Summer School 2026 (top 31,821 of 1,34,421 applicants).
- Lead, Cre8 Club – organized technical events and drove student participation; solved 200+ LeetCode problems.
